MEMORANDUM FOR: Director of Economic Research

SUBJECT : Research on Soviet Motor Vehicle Use
in Support of Trade Control Policy

25X1A9a

1. OSR is prepared to participate in a joint study with OER seeking to estimate inventories of Soviet civilian and military motor vehicles. Mr. [REDACTED] will be the responsible OSR officer working with [REDACTED] of your Office.

25X1A9a

2. In surveying our capabilities on this subject, we find that useful data and analysis are available concerning Soviet ground force motor vehicle inventories and requirements. We are lacking data concerning other Soviet forces but shall investigate whether reasonable estimates can be made in those areas. In developing the data now lacking, there may be some problems caused by existing higher priority demands on the Imagery Analysis Service.

25X1A9a

3. Looking further ahead, I suggest that Mr. [REDACTED] also map out a long range plan for obtaining the necessary intelligence and performing the necessary analysis to improve, refine and update the estimates we develop on Soviet motor vehicle holdings during the immediate effort.
